

ABOUT US

Construction Solution For Everyone. We Build Your Vision Through Quality Work.. We Believe in Fine Construction.

1 REAL ESTATE & MARKETING

is a multi-disciplinary design and construction company focused on serving our clients, empowering our employee-owners, and enhancing our communities.

Simply, we are a design, engineering and construction company. But there's much more to who we are than what we do.

The base services we offer are just the tools we use to solve our clients' real estate challenges.

Through our ability to deliver strategic and creative project solutions, we create value, which in turn, help our clients achieve their goals.

Being a firm that helps bring worth to the built environment is an incredibly rewarding and, ultimately, profound definition of who we are.

We offer a wide variety of professional services from our global offices.

Our capabilities range from architecture to interior design, full-service engineering including civil, MEP, structural and industrial process, to a variety of construction services.

The professionals at **1REAL ESTATE & MARKETING** are also capable of providing our clients a variety of strategic consulting and sustainability services, including logistics, LEED/ BREEAM consulting, energy modeling and owners services.

A true global firm with the capability to uniquely serve each location we call home.

1REAL ESTATE & MARKETING

ability to offer international design, engineering and construction services to our clients starts from our strategically located offices in the Karachi

1000 PSI CEMENT

- POWER
- FELCON

RATIO

Our Ratio

- 12 4

STEEL

True pioneer of steel industry

- D FOAM 60 GRADE

DESIGN BUILD CONSTRUCTION

We are a design-build Construction company that combines design and construction, all-in-one service. Our specialty is turn-key projects with a single point of contact. We have a pool of architects and interior designers that we work with and use our own construction crews along with carefully selected trade contractors for plumbing, electrical and mechanical work. A design-build company can better understand the project and follow the budget along the way than to only perform the construction based on outside blueprints.
